## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, 30 and 31, drawn to a cylinder lock and key combination, classified in class 70, subclass 366.
- II. Claims 12 and 14-19, drawn to a key blank, classified in class 70, subclass 406.
- III. Claims 20 and 22-27, drawn to a key, classified in class 70, subclass 409.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and either Group II or Group III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it does not set forth the specifics of claims 14-17. The subcombination has separate utility such as with pin tumblers, or with a tumbler disc having only one discrete counter surface.

Inventions Group II and Group III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group II

Art Unit: 3676

has separate utility such as for cutting a key to provide recesses to actuate pin tumblers. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

It is noted that the 35 USC 112, second paragraph rejections with respect to the dependency of claims 12 and 20 has been overcome, and the second paragraph of page 6 of the amendment of June 18, 2002 sets forth that claims 12 and 20 are directed to a key blank and key respectively, and do not further limit claim 1.
